Power Station with Audio System -Under Cabinet Version

DCS2GS-1A2L2U

- Built-in Audio system
- Complete with LED Spot Lights
- Power sockets and USB charger

- 2W miniature audio speaker, sensitivity at L/R3800MV, SNR>80db
- Suitable for all music players, with 3.5mm standard headphone jack for MP3, MP4, smart phones, tablets, iPhone5s and iPad Air

Power Station + Light -Under Cabinet Version

DCS3BST514-2U

- T5 14W G5 Base
- Built-in electronic driver
- Power sockets and USB charger

Power Station -Desktop Version

DCS2GS-2C2U

- Power sockets and USB charger
- RJ45 Data System

Socket

- National standard household power socket
- Special design in high quality flame retardant Nylon housing

USB

- Universal standard, Max. DC 5V 2100mA
- Built-in 2 x USB charging ports
- Ideal for charging cell phones, tablets, iPhone5s, iPad Air, MP3/MP4 players or other electronic devices

Data

- Built-in RJ45 Ethernet socket
- According to IEEE 802 standards
- Ensure the network speed in highest level

Clip

- Power station table mounting clip, suitable for max. 50mm thickness board
- Individual spare part add-on for DIY user

LIGHT

- T5 fluorescent lamp
- Built-in electronic preheat ballast
- 8W, 14W, 21W available
- According to EN60598 & ErP standard

LED LIGHT

- LED spot light
- Beam angle adjustable
- High brightness LED
- With LED focusing lens
- Built-in electronic LED driver
- Low power consumption & extra long life
- According to EN60598 & ErP standard

TRADE CHANNEL

Trade Channel Consumer Products (published since 1947), is a publication for importers, distributors, agents and other large volume-buyers of consumer products.

Trade Channel has a unique and highly effective rotational distribution system. This, combined with the very advanced and easy to use internet-site (www.etradechannel.net), ensures a dynamic readership allowing advertisers (exporters and manufacturers) to reach a very large audience at relatively low costs.

ENERGY SAVING

20% to 60%

Less power consumption

Increased exhibitor and visitor numbers confirm the leading international position of Ambiente

***“More than 144,000 visitors at the event of the year for the consumer-goods sector
More international than ever before: over half of all buyers from outside Germany”***

The most successful Ambiente for more than a decade closed its doors in Frankfurt am Main with a 3.5 percent increase in the number of visitors. Altogether, 144,000 buyers from 161 countries attended the world's leading trade fair for the consumer-goods sector (2013: 139,367¹ from 143 countries). Ambiente was also in top form on the exhibitor side: for five days, 4,724 exhibitors from 89 countries (2013: 4,714 exhibitors from 81 countries²) presented trends and innovations for the coming business season and, with 329,300 square metres of exhibition space (gross), occupied the same area as last year. “Ambiente has never been so international and important for the sector as today. This confirms our positioning of the Ambiente brand as the world's leading trade fair for the consumer-goods market. The positive economic climate in Germany and the upturn in the world economy have given the fair a substantial boost”, says Detlef Braun, Member of the Board of Management of Messe Frankfurt GmbH.

More than half of the trade visitors at Ambiente 2014 came from outside Germany. The top 10 visitor nations after Germany are Italy, France, the Netherlands, the USA, Great Britain, Switzerland, Spain, China, Turkey and Russia. While the number of German visitors remained stable, Ambiente welcomed more visitors from all growth regions of the world. Significant increases in the number of visitors were noted from the recovering economies of West and South Europe, e.g., Greece, Ireland and Spain. There were also noticeably more visitors at the fair in Frankfurt from East Europe and the Gulf Region. Moreover, the future World Cup and Olympic Games host, Brazil, was represented at this year's Ambiente by 23 percent more visitors than the year before while round 20 percent more visitors travelled to Frankfurt from this year's Ambiente Partner Country, Japan.

The increased level of visitor internationality was very well received on the exhibitor side. Nicolas Luc Villeroy, Member of the Board of Management, Villeroy & Boch AG, said, “The number of visitors from outside Germany has increased yet again and we welcomed representatives of the whole world to our exhibition stand. Ambiente is definitively established as the world's leading event for the sector.” Gilde-Handwerk Macrander GmbH & Co.KG made numerous contacts to potential customers from outside Europe and overseas – “Even more than at Ambiente 2013”, said General Manager Hamid Yazdtschi. “The internationality of the fair is one of the quality criteria for events at Frankfurt Fair and Exhibition Centre.”

Thomas Grothkopp, Director General of the German Association for Tableware, Housewares and Home Decor (*Bundesverband für den Gedeckten Tisch, Hausrat und Wohnkultur e.V.*), also sees this development in a positive light: “Frankfurt is distinguished by a high degree of internationality – which is also in the interests of the German retail trade – and an outstanding overview of the latest trends and innovations. The good overall climate of consumption represents a solid foundation for placing orders, which gave this year's spring fair fresh impetus.” This assessment is shared by Bernd D. Ehrengart, CEO of Lambert GmbH: “The demand in the retail trade is growing and this was reflected by an increased propensity to place orders among our customers. The volume of orders taken from the German-speaking countries was very good and we anticipate an overall increase in sales compared to last year.” On the visitor side, the level of satisfaction with the fair remained unchanged at a very high 96 percent.

The Partner Country of Ambiente 2014 was Japan. At Ambiente 2015 from 13 to 17 February, the USA will present its world of consumer goods within the framework of an extensive programme of events.

LED integrated no shaded area brackets

- 1, 150 tablets of light bead design, more efficiency in energy saving.
- 2, Use Japanese light diffusion technology for 120° viewing angle. LED with strong light penetration.
- 3, Unique patent design bracket for connecting to each other eliminated shaded areas provide soft and comfortable environment.
- 4, Can connected up to 20 LED lamps with ease and save time.
- 5, integrated extruded aluminum forming provide beautiful outlook and practical use. It can provide rapid cooling to ensure the life of lamp beads
- 6, the use of isolated constant current source circuit providestable start and guarantee safety.

Applications : jewelry stores, billboards, secondary glazed ceiling and places where replacement is not convenience.

Patented Number: ZL200920108340.0

FRONTIER OF LED

Patented Number: ZL2010206113787.6

Patented LED bulb

- 1, Patented outlook with structure for better heat dissipation. ;
- 2, the unique secondary glazed lamp posts provide better lighting effect.
- 3, United States CREE LED chips provide better lighting color and unique lighting effects.
- 4, Safety designed constant current source provide better quality assurance.
- 5, large surface aluminum heat sink ensure the lamp bead life.

Hong Kong Electronics Fair (Spring Edition) and International ICT Expo

Set to Showcase the Hottest Trends in April

The latest electronics and technology trends are going to be unveiled in Asia's largest spring electronics fair, the HKTDC Hong Kong Electronics Fair (Spring Edition) and the HKTDC International ICT Expo in April this year. In 2013, the two annual fairs attracted more than 90,000 buyers coming from around the world. In the 2014 editions, the twin fairs will continue to provide the international platform for over 3,250 exhibitors to showcase their hottest electronics products, as well as their cutting-edge information and communications technology services, to potential business partners worldwide.

Entering into their eleventh editions, the HKTDC Hong Kong Electronics Fair (Spring Edition) and the HKTDC International ICT Expo will be held concurrently at the Hong Kong Convention and Exhibition Centre from 13 to 16 April 2014.

Mr Benjamin Chau, Deputy Executive Director, HKTDC, said, "Innovative electronic gadgets and technology services are increasingly changing our daily lives nowadays. In the upcoming Electronics Fair, we are very excited to launch three new product zones including 3D Printing, Baby Tech and i-World, while for the ICT Expo, there will be two new zones called "Telecom, Network & Data Centre" and "Mobile & Digital Marketing". Exhibitors and buyers will be able to explore new product categories and expand their businesses through this global trading platform of the year."

Visitors will find the new zones in Hall 5FG and Hall 3FG, in addition to other popular zones. During the fair, some exhibitors will also highlight their latest offerings in the product demo and launch pad sessions throughout the fair period.

The Hall of Fame, showcasing the branded electronic products, has been a spotlight of the Electronics Fair each year. Joining the zone this year includes Coway, Foryou, Intel, Lenco, Polaroid, Rexant, Tunbow and many more. Three group pavilions from the Chinese mainland, Korea and Taiwan are all ready to enchant visitors with their latest collections.

Running concurrently with the Electronics Fair, the ICT Expo is the ideal platform for different industries to look for the latest ICT solutions and services, while IT practitioners can explore potential partners to expand their businesses. The ICT Expo brings the newest enterprise solutions, retail technologies, mobile applications, cloud computing solutions, telecommunications & network products for all businesses. This year, visitors will see new trends including data centre and digital marketing, featuring exhibitors such as Hutchison Global Communications Limited, Google and SINA Hong Kong Limited. Other themed zones include "Smartphone & Tablet", "Home-grown Innovations" and "Wireless Technologies".

Small-Order Zone will continue to serve as a convenient platform for buyers to source in smaller lots. Products at the Zone will be available in the minimum order quantities of 5 – 1,000 pieces.

Other highlight of the two fairs is a series of industry seminars, forum and networking receptions for exhibitors and visitors to share the latest trends and development of the industry.
