Guangzhou International Lighting Exhibition

- Over 1,300 exhibitors already confirmed for the 2014 show

The 19th edition of Guangzhou International Lighting Exhibition is officially confirmed to take place from 9 – 12 June 2014, once again at the China Import and Export Fair Complex. The event, regarded as the most influential and comprehensive lighting and LED event in Asia, will expand to solely occupy 21 halls during its four-day run. In total, 215,000 sqm of exhibition space will be dedicated to promoting the latest innovations both in lighting and LED technology.

The show's organiser, Guangzhou Guangya Messe Frankfurt Co Ltd, has already received booth reservations from over 1,300 domestic and international brands. Their specialties span virtually every important sector in lighting and LED technology. Some of the confirmed exhibitors and their associated product categories include:

- **Lighting fixtures** – ADATA, GE, KONKA, Ledman, Lextar, Neo-Neon, Optiled, QSSI, Thorn Lighting, Simon Electric, Yajiang, Zalux
- **Lighting accessories and components** – AAG Stucchi, Alanod, Almeco, Arditi, BJB, BWF Profiles, Ledlink, Wieland Electric
- **LED chips, modules, package and packaging materials** – APT, CREE, Edison Corp, Epistar, Epilight, Genesis, HC SemiTek, Honglitrionic, Semileds, Panasonic, Seoul Semiconductor, Shin-etsu, WACKER
- **LED driver ICs, transformers and ballasts** – BAG, Fulham, Helvar, Macroblock, Mean Well, MOSO, NXP, O2Micro, On Semiconductor, Power Integrations, Tridonic
- **Product and inspection, equipment and test laboratories** – Everfine, Konica Minolta, Labsphere, Nordson, Zvision, Intertek, Bureau Veritas

Commenting on her vision for the show's future, Ms Lucia Wong, Deputy General Manager of Messe Frankfurt (Shanghai) Ltd noted: "Each year, the Guangzhou International Lighting Exhibition aims to assemble leading industry associations, influential government bodies and most importantly, respected and trusted brands, to help further the development of lighting design and technology. Thanks to the support of the international and domestic lighting community, the show has grown significantly since its first edition. It has transformed into an internationally-recognised industry platform for the exchange of marketing intelligence, technical innovation and ground-breaking design."

Sustainable lighting solutions and LED technology integration: Key focuses of the 2014 show

Sustainable lighting solutions have become one of the biggest driving forces for growth in the lighting industry. Project-based enterprises in particular have adopted the concept as it offers greater opportunities for meeting various goals and policies designed for property and infrastructure development.

The 2014 show continues to be at the forefront of this concept by highlighting the integration of control technology into lighting products; showcasing diverse lighting applications in energy efficiency, luminosity, user comfort and environmental impact. Controller and driver technology has rapidly grown in popularity among lighting professionals, for their ability to allow users to customise lighting by application, while providing effective energy efficiency. Current products and solutions for these state-of-the-art technologies will be on display at hall 12.2, an area solely dedicated to suppliers of controllers and drivers at the 2014 show.

LED technology integration will be another key focus for the 2014 lighting fair, by presenting a one-stop sourcing platform that covers the full LED industry value chain. This will include raw materials and wafers, LED chips, packaging materials, packages, modules and components, drivers and controllers, equipment as well as applications. Ms Lucia Wong added: "The 2014 show will be a reflection of the lighting and LED industry of today and tomorrow."

The industry is facing fierce consolidation. And my hope is it to provide attendees of the show a comprehensive view of all areas in lighting development as well as to facilitate interactions that can lead to business and technological collaboration among industry players."

Guangzhou International Lighting Exhibition, along with the concurrently-held Guangzhou Electrical Building Technology, is headed by the biennial Light + Building event, which will take place from 30 March – 4 April 2014 in Frankfurt, Germany.

TRADE CHANNEL

At 2014 CES Las Vegas

By, Allan London—Trade Channel Editor

The CES 2014 in Las Vegas was truly the most spectacular yet. Of course, the key to the show continues to be INNOVATION.

The show is owned and operated by the Consumer Electronics Association (CEA) and featured new and varied technology.

Many keynote speakers were in attendance including the CEA's own president/CEO Gary Shapiro and many top executives/speakers from Cisco, Intel, Yahoo, and Sony. On day two, US Commerce Secretary Penny Pritzker had one on one discussion in the morning and FCC Chairman Tom Wheeler in the afternoon.

This year, the attendance was up with over 152,000 visitors—up from last year. There were 3200 manufacturers, developers, and suppliers of consumer technology hardware, content, technology delivery systems and much more—up from last year's numbers. 5000 media representatives were also on hand spread out over the 1.92 million square feet of this massive auditorium, the Las Vegas Convention Center. Also utilized were the Venetian and Mandalay Bay hotels.

Some of the key technologies on display were 3D printing, driverless cars, wearable technology, digital health technology, sensor technology, robotics and UHD or Ultra High Definition television(4k and 5k). even more spectacular than last year.

Samsung displayed the world's first CURVED 4 television and LG displayed the first 77" 4k including the OLED or organic light emitting diode display.

This writer also has an international radio show and on day two broadcast a 15 minute segment right from the show floor as the Trade Channel exhibitor/editor.

All in all, Marla and I had excellent show coverage as our booth was in a heavily travelled area of LVCC South Hall. We spent some time visiting booths before the show opened in the mornings giving a lot of one on one time with the manufacturers. One booth I stopped at on day three was the Mitek Electronics booth—the manufacturer of MTX audio equipment, Atlas Sound, and Innovative Electronics Design to discuss their products and Trade Channel magazine. I was very impressed with the knowledge base of Mr. Mark Schleipfer the mobile marketing manager and Mr Eric De Gaston, the Show and Technical Generalist.

This, once again was a unique experience and we will look forward to Trade Channel's presence next year at CES 2015.

COLOPHON

TRADE CHANNEL

Trade Channel Consumer Products (published since 1947), is a publication for importers, distributors, agents and other large volume-buyers of consumer products.

Trade Channel has a unique and highly effective rotational distribution system. This, combined with the very advanced and easy to use internet-site (www.etradechannel.net), ensures a dynamic readership allowing advertisers (exporters and manufacturers) to reach a very large audience at relatively low costs.

Publisher
